

Application no. 09/881,295
Amdt. dated Jan. 20, 2006
Reply to Office Action of Oct. 20, 2005

Please replace the ABSTRACT section, page 8 lines 5-9 of the original filed application, with the following amended:

One aspect of the disclosure is a method of providing a proxy user interface. A proxy user interface is provided for a secondary application activated by a user input. The proxy interface displays current or default settings for a task of that application. If no user use input is received through the proxy interface, the task is performed. If a user input is received, the user interface for that application is presented to the user.
